

As Disciples of Jesus Christ, we decided that the best way to achieve that as a group would be to meet on 3 separated occasions to do a group Come Follow Me lesson. We determined that this goal would be successful based on our group attendance and meeting 3 times in 3 weeks. Come Follow Me is an inspired teach method provided by our church leaders, it's sole purpose is to help us become better disciples of Christ and improve in our daily living by learning the words of God, and prophets before our time.

Our second goals was to become sound thinkers by learning from others with more experience. We planned on attending at least one career fair by the end of the semester, with the goal that was we learned their as a group we could apply what we learned in our daily lives. Being able to solve problems in any way, is crucial to any field of work, and we do that best when we are able to see it from someone else's perspective.

Team presentations was our top pick of how we could best learn from one other. Each week, we would share with the group something new we learned, and it could be anything really. It allows us to strengthen both our listening, and presenting skills and it creates an atmosphere where we can openly speak with one another without the fear of being judged.

The best way to improve our collaboration skills is to work on a collaborative project! So we did just that with our recreative of a digital Book of Mormon that can be used in various applications. We pushed ourselves to not only better ourselves, but to work with each others, and no against each other. We have the same goal, so we should get there as a team.
